

## WASTE WASTE HEAT RECOVERY FOR SHOWERS

Easy to retrofit and saves energy with every shower use!

### RECOUP HEATDECK™

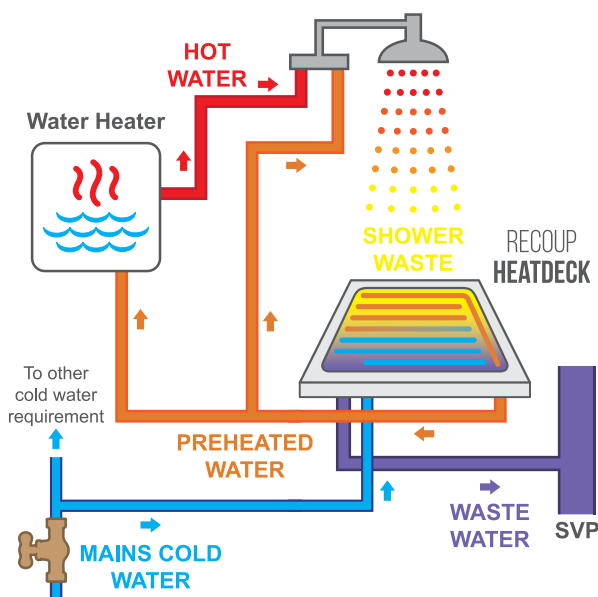

- Horizontal WWHRS integrated shower tray
- High heat recovery efficiency
- TMV mixer or Mira Heatloop™ electric shower compatible
- Compatible with all water heaters: gas combi, cylinder (boiler or heat pump), or direct electric
- Size options with upstands, BioCote® technology, in white gloss or Mira Flight Safe anti-slip
- No end user interaction required
- No change of use, or change to showering experience
- No planned maintenance, fully accessible from above for complete peace of mind
- SAP listed
- Designed and manufactured in the UK
- 5 year product warranty

### How it works

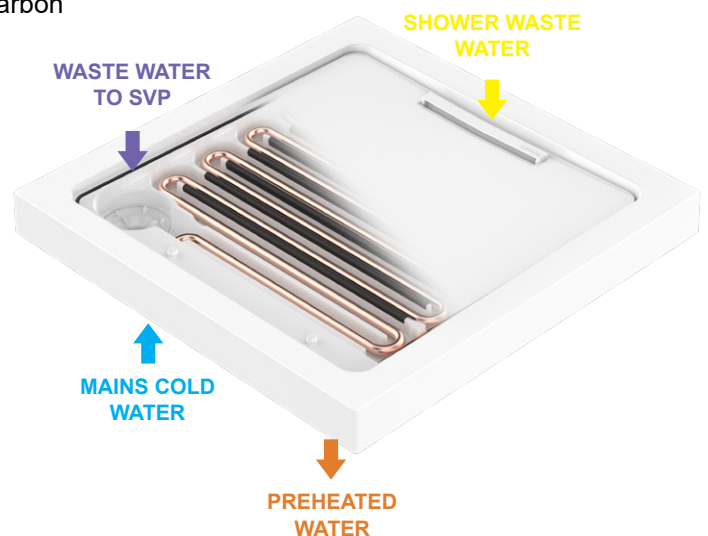

Waste Water Heat Recovery for Showers (WWHRS) extracts the heat from the shower waste water and transfers it to the cold feed of the shower, and / or the water heater for the property. This reduces the demand for hot water which saves energy.

It is a completely passive technology, providing fantastic carbon reduction and energy savings for homes.

#### SYSTEM A INSTALLATION METHOD

Sends preheated water to the water heater and the cold side of the shower.
